Case Study 20: Online Food Ordering Website

Overview

This case study presents a restaurant website concept for browsing food, viewing menu items and prices, learning about the restaurant, and making a table reservation. Its cream background, dark green sections, and gold accents create a warm dining identity.

Objectives

- Display menu items with photographs, descriptions, and prices.
- Build trust with chef profiles, restaurant ambience images, and customer reviews.
- Make opening hours and location easy to find.
- Collect reservation details such as contact information, date, time, guest count, and special requests.

Main Features

- Navigation links to the main website sections.
- Menu cards for salad, pizza, burgers, and other dishes.
- Chef profiles, ambience photography, and customer testimonials.
- A reservation form for table-booking requests.

Design and Usability

- Consistent typography and card layouts help visitors scan information quickly.
- Food photographs provide a visual preview of menu choices.
- Responsive layouts should keep cards and form fields usable on mobile devices.

Possible Improvements

- Add a shopping cart, online payment, order tracking, and order confirmation.
- Validate form entries and connect reservations to a database or booking service.
- Improve accessibility with descriptive image text and visible keyboard focus.

        color: white;
```

Case Study 26: College Fest Management Website

Overview

This case study describes a college festival website that communicates event information and supports student registration. A purple and orange color scheme creates a festive identity, while dedicated sections organize event categories, the schedule, coordinators, rules, and registration.

Objectives

- Promote the college fest and display its dates prominently.
- Organize technical events, cultural activities, and workshops in one place.
- Publish a clear schedule with dates, times, and event names.
- Collect student registration details and event preferences.

Main Features

- A banner with the fest name, tagline, dates, and registration call to action.
- Event cards for technical events, cultural performances, and workshops.
- A schedule table, coordinator information, and participation rules.
- A registration form with student name, email address, and event selection.

Design and Usability

- High-contrast colors and prominent headings give the website an energetic appearance.
- Cards separate event types, and the schedule table presents details in a structured way.
- A mobile-friendly layout should adapt cards and tables to narrow screens.

Possible Improvements

- Add registration confirmation, participant IDs, and email notifications.
- Allow authorized coordinators to update schedules and manage registrations.
- Include venue details, capacity limits, accessibility information, and event updates.

Case Study 18: Hostel Reservation Websites Interface

Overview

This case study presents a hotel or hostel reservation interface where visitors can compare room categories, review facilities and nightly prices, and submit booking details. Navy blue and light blue create a calm, professional hospitality style.

Objectives

- Show room categories and their main benefits.
- Display nightly rates clearly to support comparison.
- Explain facilities such as Wi-Fi, swimming pool, restaurant, parking, and room service.
- Collect guest details, room type, check-in and check-out dates, and guest count.

Main Features

- Room cards for Standard Room, Deluxe Room, and Luxury Suite.
- Room images, descriptions, prices, and booking buttons.
- A hotel facilities section and structured reservation form.
- Hotel branding, navigation, welcome section, and location information.

Design and Usability

- Room cards help guests compare accommodation options quickly.
- The form groups booking fields and uses date inputs for arrival and departure.
- Responsive design should preserve readable details and usable controls on mobile devices.

Possible Improvements

- Check room availability and prevent double bookings before confirming a reservation.
- Calculate the total from room rate and nights, including applicable taxes and fees.
- Add booking confirmation, cancellation rules, secure data handling, and payment integration.
